

## QUALITY POLICY

**BlackStone Tek (Pty) Ltd** is an organization at the forefront of the design, development and manufacture of Carbon Fibre wheels and accessories, as well as other composite components. Our technology is new and innovative and we therefore strive to be known as the market leader in our field.

We realise that the major proportion of our marketplace is the supply of a safety critical component. We therefore undertake to comply with our customer requirements, both as specified by the customer and known by our technology, to reasonably ensure the safety of the end user. We will also comply with all legal and regulatory requirement related to our products. To this end we will maintain our already achieved Site approval and wheel type approval through an International Certification Body (TUV) where possible.

We commit to the nurturing of a culture of continual improvement and will follow a proactive approach of defect prevention in order to achieve both improvement and customer satisfaction. Furthermore customer satisfaction will be measured on an ongoing basis and quality objectives will be set as a basis for improvement.

The evaluation of the ongoing suitability of our Quality Management System and this policy will form an integral part both of management review and other management forums.

The principles embodied in this policy will be communicated to all staff members. Staff will also receive the appropriate training to ensure their basic job skills, competency, development needs and a pro-active contribution to the overall integrity of the Quality Management System.

In order to facilitate the achievement of this policy the board has made a commitment to the achievement of ISO 9001 certification of the developed system.

This policy is a public document as part of **BlackStone Tek (Pty) Ltd's** philosophy of transparency and is therefore on display and available to all stakeholders in our business.
